

Extended Producer Responsibility Program (EPR)

Green Dot Sign® maximizes visual impact while minimizing environmental impact. As part of this commitment we have a return and recycle program for our wood based signage. Upon receipt, old signs are cleaned as needed, and the wood is shredded then used as animal bedding. Bedding then becomes crop fertilizer and eventually decomposes into dirt.

This cycles the wood carbon through various uses before returning to the earth.

Program Steps

Email info@greendotsign.com to notify us of your pending return. Please include original invoice number, project name or similar identifier. We'll send you shipping information.

Please contact us with any questions.
