

BENEFITS - DESIGN AND USE

- Extreme Exterior Durability
- Extreme Vandal Resistance
- Wide Size Range
- No Adhesive to Fail
- Solid Metal
- Premium Craftsmanship
- Appropriate for Surgery Areas & Food Processing Plants
- Easy Installation
- ADA Compliant

BENEFITS - SUSTAINABILITY

- All Reductive Manufacturing Waste is Recycled
- 0.25 lb. per Sign Plastic Reduction
- Automotive Grade Paints
- Easy to Recycle at End of Life

Aluminum with blue paint match, satin topcoat and stud mounting.

Pro Tip: if your restroom signs require two rows of copy, total height should be 9" or more to meet ADA sign requirements.

DESCRIPTION

Green Dot Sign® Exterior ADA Signs are machined from solid aluminum, brass or bronze plate. Letters and braille are in relief from the background and machined from the same continuous piece of metal. Backgrounds are painted in high durability paints and automotive grade topcoat. The result is extremely durable, beautiful and easily recyclable tactile signage and plaques.

PRIMARY USES

The Americans with Disabilities Act (ADA) requires tactile signage marking every permanent room and space in a public facility. Green Dot Sign® Exterior ADA Signs meet this requirement for exterior applications.

Common ADA applications include exterior restrooms at parks or swimming pools, accessible entrance direction and identification as well as exterior mounted tactile ADA signs.

Green Dot Sign® Exterior ADA Signs are also used in applications beyond the scope of the ADA. For example, park system signage, permanent exterior messaging and plaques.

ADA Standard	Description
§216.2	Signs Identifying Permanent Rooms and Spaces
§216.4.2	Areas of Refuge
§§703.2 - 703.3	Raised Characters & Braille
§§703.5, 216.3	Visual Characters
§§216.4 - 216.12, 502.6, 703.7	Symbols of Accessibility

Characteristic	Parameter
Size	2.25" x 2.25" Min, 30" x 30" Max
Thickness	0.25", 0.375" typical
Background Colors	Any solid paint color, PMS & major paint maker matching available
Materials	5052 Aluminum, CA 260 Brass, CA 954 Bronze
Topcoat	Clear Satin or Matte
Installation	Threaded studs, cleats, VHB & through holes
Letter Color	Brushed Metal

Note letters and pictograms are same height, while braille is slightly lower and always the background color.

Exterior ADA Signs

PRODUCT DATA SHEET

MasterFormat 10 14 67 Tactile Signage, 10 14 15 Interior Signage
& 10 14 16 Plaques

Beautiful signs for a better planet

LIMITATIONS

Raised characters, pictograms or design features such as borders are only offered in brushed metal color. Braille, when used, must be sign background color.

Brass and bronze signage often weighs several pounds per sign, making proper evaluation of mating surface critical.

INSTALLATION

Typically signs are supplied with 4 tapped blind holes, studs and mounting pattern. Pattern is fixed to wall location and installer drills through paper into wall. Silicone or equivalent is applied to studs and back of sign before firmly pressing against the wall. See Green Dot Sign® 4-peg installation method video for more.

Blind Tapped Hole & Stud

Cleats and through holes also work well. Please contact manufacturer with installation questions.

PROFILE

Green Dot Sign® Exterior ADA Signs are available in a range of thicknesses, but are most commonly produced from 0.25" plate with typical finished dimensions as seen below.

MAINTENANCE

A Green Dot Sign® is maintenance free. Clean as needed with detergent and water. Wipe dry with a clean rag. Do not use abrasives or harsh chemical cleaners.

AVAILABILITY AND COSTS

Each Green Dot Sign® is made in the USA. Lead times range from two to several weeks. Typical costs are \$100 - \$300 per sign depending on size, material, quantity and design.

WARRANTY

Product includes a best in class, limited lifetime warranty.

For more information please contact Green Dot Sign®.

Dark blue paint matched brass with matte topcoat, through holes and stud mounting.

Pro Tip: pictograms require a vertical field of 6" without other content but can be any height. Choose large pictograms for signs viewed from 25' or more and small for signs viewed closer.

From top left, clockwise: bronze, aluminum and brass shown next to each other.

Thoughtful designs can also be extremely beautiful & durable.
